MD's Message

At Unique Plumbers, we're more than just a plumbing and engineering service company. We're a team of dedicated professionals built on a foundation of shared core values: safety, timeliness, cost-effectiveness, quality, and environmental responsibility.

From project inception to completion, we collaborate closely with our clients.

This collaborative approach ensures we understand your needs thoroughly and deliver the best possible outcome. We're driven by a commitment to integrity, satisfaction, and building long-lasting relationships with our clients.

Our expertise extends beyond traditional plumbing services.

We offer innovative and sustainable solutions for all your plumbing and engineering needs, ensuring your project meets the highest standards while minimizing environmental impact.

We're passionate about what we do, and it shows.

We're proud of our reputation for excellence and look forward to working with you on your next project.

Regards,

ENG. BERNARD LWANYAGA

Who Are We

Unique Plumbers (U) Limited Company is a multi-service engineering company specializing in providing our clients with unique solutions that move beyond the individual project. We seek to understand your vision and provide a thoughtful plan that enhances and encompasses your corporate strategies.

Established in 2016 as a Plumbing engineering company for a variety of industrial and commercial clients, the Company's engineering professionals involved with the planning, design and installation of building systems related to plumbing, including water supply and drainage. We can help you visualize the entirety of your project from evaluating utilities with energy impacts and operating costs to providing construction documents with our Plumbing and Process engineering disciplines.

Unique Plumbers also provides energy management expertise, construction contract administration, construction cost budgeting, and scheduling services. A strong team of Engineers, Energy experts, Revit/AutoCAD designers support our professional staff.

YOUR VISION IS OUR MISSION

Unique Plumbers Company's dedication to thorough project management, quality control, cost accountability, and on-time delivery has won the company unparalleled respect from our clients. In fact, over 80 percent of Unique's business is from repeat customers and direct referrals.

Unique commits fully to serving its clients through customer service and works tirelessly to meet their needs. Unique's professionals manage large and small projects with professional expertise and offer personalized service while providing innovative solutions to any challenge with accuracy and enthusiasm.

We consider ourselves to be an integral part of the client's project development team. Throughout the duration of a project, Unique's single point-of-contact communication approach provides you current information on your project's progress.

Our Philosophy

At UPL, we believe you shouldn't have to worry about your engineer. To realize this goal, we've structured every area of operation to ensure that our customers and partners receive comprehensive services that are both effective and professionally managed.

By treating our staff fairly, we've retained some of the most capable and conscientious technicians, engineers and project managers across the metropolitan and beyond. By investing in employees, we've developed a staff that provides unparalleled technical and project support to both our field team and our clients.

We've refined processes to ensure that projects run smoothly from the first estimate through final inspection and invoicing.

Our proactive communications ensure that each customer understands the status and direction of every project at all times.

Core Values

Customer-Oriented

Earn customer loyalty by delivering results beyond our customer's expectations.

Commitment & Accountability

Be accountable for delivering on your commitments.

Ownership

Everyone has responsibility to be proactive and take initiative.

Quality

Continuously improve upon quality of the work you deliver everyday.

Innovation

Create new value and new satisfaction for the customer: Be creative to make the impossible possible.

Great place to work

Strive for professional and personal growth in an enjoyable work environment.

Mission

To deliver value to our customer. Value demands we render high quality service, with integrity, in a professional manner, at a fair price.

Vision

To bring life to plumbing by allowing our clients to express themselves and their personalities

In our view, providing plumbing services of the highest quality is only a part of our mission. We deliver outstanding service in ways that benefit your project and your business every day.

Whether it's installation, renovation, or repair, we offer residential and commercial plumbing services that you'll choose to rely on for project after project.

Simplicity

We make it easy to do business with Unique Plumbers Limited. For contractors, our practices fit right in with your procurement, project management and worksite procedures. For homeowners, we provide both clear, reliable advice and easy-to-understand estimates. In every case, we treat our customers like we'd treat our own family.

Quality

Regardless of the task, we provide the highest quality around. Our technicians & engineers and technicians deliver quality on every project. Authorities routinely approve our work on first inspection, avoiding delays. We stand behind our work on every project we complete.

Safety

Our safety policies complement existing worksite programs. Each of our field personnel receive training and hold Operational License. Our monthly toolbox meetings cover the latest safety developments and corporate policies. Our safety record speaks for itself.

Why Choose Unique Plumbers?

Unrivaled Expertise, Unwavering Integrity, Unsurpassed Results:

When it comes to your plumbing needs, trust matters. At Unique Plumbing Company, we've built a reputation for impeccable workmanship, reliable service, and transparent pricing that surpasses industry standards.

Technical Skillsets that Impress:

- Master certified technicians: Our team boasts unparalleled training and certifications, ensuring they tackle even the most complex plumbing challenges with precise skill and efficiency.
- Cutting-edge solutions: We stay ahead of the curve, utilizing the latest innovations and materials to deliver long-lasting, sustainable plumbing systems.
- Preventative maintenance: We go beyond fixing problems; we prioritize proactive maintenance strategies to minimize future headaches and expenses.

Customer - Centric Services that Delights:

- Timely and respectful: We value your time and schedule, prioritizing prompt arrival, clear communication, and courteous interaction.
- Honest and transparent: We believe in fair pricing and upfront estimates, with no hidden fees or surprises.
- Unwavering commitment: We stand behind our work with comprehensive warranties and responsive after-sales service.

Our reputation for quality work and excellent value can't be matched. It is a reputation earned by years of hard work and training in all that we do and by operating as a team of professionals

Choose Unique Plumbing Company for:

- Guaranteed expertise: Our technicians possess the highest levels of industry knowledge and practical experience.
- Stress-free service: We handle every detail, from meticulous planning to seamless execution, leaving you with peace of mind.
- Sustainable solutions: We prioritize environmentally friendly materials and practices for the long-term health of your property and our planet.
- A partnership you can trust: We value your satisfaction and build lasting relationships based on integrity and mutual respect.

Your Community Partner, Every Drip and Drain:

- We're not just technicians & engineers; we're proud members of your community. We take immense satisfaction in contributing to the well-being of our neighbors, both through exceptional plumbing services and active community involvement.

Commercial

At Unique Plumbers, we proudly offer a wide variety of commercial plumbing repair and installation services. Our highly experienced commercial technicians & engineers repair and install all brands of plumbing fixtures. We offer satisfaction guarantees to show our confidence in our services and earn your trust and future business. We pride ourselves on our professionalism and focus our efforts on building lasting business relationships. Our goal is to listen to your specific needs, perform an in-depth analysis, and present you with quality options for all of your plumbing projects.

For our commercial plumbing customers, we strongly recommend scheduled maintenance services to help keep your business running smoothly. Scheduled maintenance can save your business money in the long run by helping to prevent emergency plumbing problems.

Residential

When it comes to all of your home plumbing needs, we are the plumber service you can depend on! We are proud to serve the Kampala Metropolitan including Wakiso, Mukono, Entebbe and other surrounding areas.

Our residential technicians & engineers have the best education in the industry and can help you with any type of problem you have no matter how large or small. They will work directly with you to figure out the best possible solution to meet the needs of your home and family. 100% customer satisfaction is our number one priority, and we treat your home and property with care and respect as if it was our own.

When it comes to residential plumbing services including repairs, installations, inspections and maintenance, Unique Plumbers is the plumbing company that you want working for you!

Inspections

Just like regular check-ups keep you healthy, regular plumbing inspections keep your home's water flowing smoothly. Our expert engineers and technicians at Unique Plumbers Limited will thoroughly examine your entire plumbing system to identify any potential issues before they become big problems like leaks or clogs. This ensures your home has safe and reliable plumbing.

Preventative Plumbing Maintenance

Give yourself additional peace of mind when buying a new or pre-owned home. Call us for a comprehensive plumbing maintenance inspection of the plumbing systems of your prospective home or business. We can inspect faucets, fixtures, water heaters, supply lines, shut-offs, shower pans, and sewer yard line using our DrainVision camera inspection system.

We also perform routine plumbing maintenance checks on the various components of your plumbing system. Scheduled maintenance can ensure that your plumbing units are working at their maximum efficiency to save you money and energy usage. Keeping up on the health of your system can help you avoid costly and unnecessary repairs and plumbing replacements in the future.

New Build Plumbing Services

At Unique Plumbers, we specialize in designing custom plumbing systems to specifically meet the needs of your home or business. It's important that you choose a plumbing company that will take the time to explore your needs and present detailed options to meet them.

Our commercial technicians & engineers are trained to the highest of industry standards and safety. We hold ourselves to the utmost professional standards and take pride in helping our clients achieve the best possible outcome.

Manufactured Home & Mobile Home Plumbers

Mobile home plumbing and manufactured home plumbing is a service that we proudly offer at Unique Plumbers. Plumbing in these types of homes can vary and often times have different codes all together than plumbing in a site-built home.

While many other residential technicians & engineers in Kampala, Wakiso and surrounding areas do not offer such services, we have had efficient training and our plumbing technicians are prepared to handle any installation, repair or maintenance you may need. We understand the ins and outs of mobile home plumbing and know that plumbing is responsible for a big percentage of mobile home repair problems. Don't let these issues get in the way of your life! We're here for you whenever you need us.

FIRE FIGHTING SYSTEMS

UPL provides fire suppression services in Uganda and beyond. Our team provides installation, design, inspection, testing, and service of fire suppression systems and special hazards systems.

Special hazards systems are used when the environment is very high-risk or prone to damage from traditional fire sprinkler systems. We offer certified and trained technicians who install, service and inspect special hazards systems such as FM200 Systems, CO2 Systems and high expansion foam suppression systems. A special hazard fire suppression system is typically used in areas where the facilities or assets need to be preserved or where water damage would prove costly. At UPL we understand the cost of downtime and process interruption. We work with you to install the right system and offer 24-hour support to make sure that you are up and running in a timely manner if your systems were to activate.

Since its inception, Unique Plumbers has been a leader in fire safety, dedicating itself to the well-being of its customers through comprehensive fire protection services and top-quality products. We stand by our commitment to excellence, delivering the following to ensure your safety and peace of mind:

Comprehensive Fire System Services:

- Design and Project Management
- Hydraulic Calculations and Simulations
- Expert Fire Consultancy (Mechanical)
- Tailored Training Programs (Theoretical & Practical)
- Reliable Material Supply and Procurement
- Professional System Installation & Commissioning
- Long-Term Maintenance and Support
- System Leak Testing
- Comprehensive Fire Risk Analysis Reports
- Unmatched Expertise and Industry Knowledge

From industrial facilities and road tunnels to health-care centres, Unique Plumbers caters to diverse sectors. We specialize in safeguarding residential and commercial projects, shopping malls, office buildings, tourism complexes, management facilities, and educational institutions.

Don't wait for an emergency. Invest in your safety today. Contact Unique Plumbers and schedule an appointment with the best fire protection experts near you.

Design Installation Inspection Service Repair

SYSTEMS

- Fire Sprinkler System Installation
- Dry & Wet Risers and Hydrants System Installation
- Fire Hose Reel Installation
- Water Extinguishing Systems
- Foam Extinguishing Systems
- Gas Extinguishing Systems (FM200, Powder etc)
- Fire - Gas Detection Alarm and Detection Systems
- Passive Fire Stop Systems

FIRE SUPPRESSION INSPECTIONS & EMERGENCY SERVICE

UPL provides testing and inspections for your fire suppression systems. Room integrity testing is performed to make sure that the system will be able to retain the agent in the room to effectively suppress a fire.

At UPL, our technicians can provide inspections of your system on a monthly, quarterly, semi-annual, or annual basis, depending on your insurance or local and industry regulations. During our inspection, we will check gauges, make sure tanks are filled and

check for leakage of gas.

Along with your fire suppression system, UPL can install a fire alarm and detection system to make sure that you are prepared for a fire. We also provide fire alarm and security monitoring for 24-hour protection for your industrial or commercial facility.

In addition to inspections, UPL also offers 24-hour emergency service if something goes wrong with your fire suppression system. Give us a call and we will send a technician to assist you. We can provide repairs to your suppression system to get it up and running as quickly as possible.

Work with UPL for your special hazards fire suppression system installation. We will help you determine which system is required for your facility based on the unique hazards present. Contact us for a cost estimate on fire suppression system design and installation.

HVAC

We specialize in providing comprehensive heating, ventilation and air conditioning (HVAC solutions) to the residential, commercial and industrial sectors.

UPL offers extensive experience in providing turnkey solutions to clients, offering a single point of contact for supply and installation and effective maintenance of all types of heating, ventilating and air conditioning systems for every type of building. UPL has the capacity to carry out turnkey projects from the creation of designs, installation, maintenance in addition to repairs of mechanical ventilation systems.

With a fully equipped workshop, we are able to roll, bend, fold and provide an aesthetic finish on all installations as well as provide a short project turnaround period.

HVAC systems

An HVAC (Heating, Ventilation, and Air Conditioning) system is an essential component of any modern building or home. It plays a crucial role in maintaining a comfortable indoor environment, regardless of the weather outside.

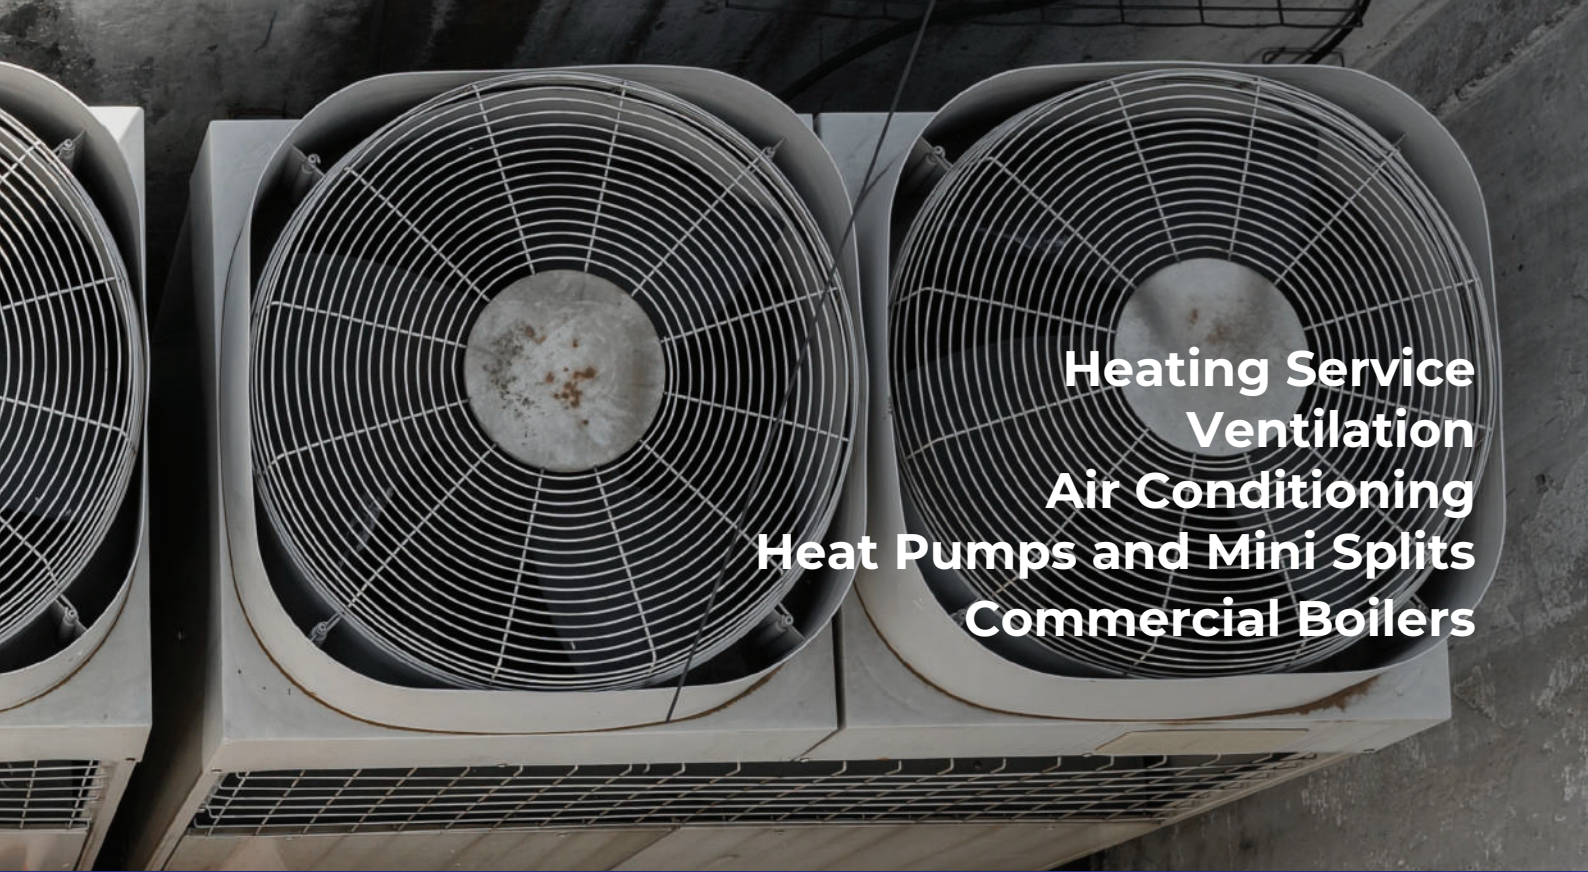

It provides consistent heating and cooling, improves air quality, and leads to cost savings on energy bills. If

you are considering installing an HVAC system in your home or building, contact UPL contractors for assistance.

UPL specializes in supplying, installing, and maintaining air conditioning systems for commercial and industrial properties. We offer a range of services, including preventive maintenance for HVAC installations in corporate office buildings, military installations, medical facilities, and shopping centers etc. We also take on installation projects of varying sizes and complexities. Our commitment to delivering exemplary performance and reliability has earned us a strong reputation among our clients. We strive to achieve customer satisfaction in all our projects, which has helped us establish a loyal clientele.

Unique Comfort, Always Flowing: Your Expert Heating Solutions in Uganda

From prompt emergency response to your first contact, we offer comprehensive expertise in both gas and oil-fired forced-air heating systems. Our commitment extends beyond the initial call; we deliver complete, convenient solutions, complete with thorough clean-up upon project completion.

**Heating Service
Ventilation
Air Conditioning
Heat Pumps and Mini Splits
Commercial Boilers**

Heating Service

Heating services refer to installation, maintenance and repair of boilers, heat pumps, furnaces, radiators, forced-air, ductless mini-splits, radiant heating and baseboard heaters. In Uganda, the primary fuels for heating services come from electricity, oil and natural gas, with coal, wood and alternative fuels far behind.

When it comes to heating services, you want to hire an honest, licensed, insured company experienced and trained with a variety of brands and styles of heating homes and businesses.

Safety and efficiency are the two biggest reasons why heating systems need regular service. Particularly in commercial buildings where all floor spaces are packed with heating systems, almost have of the energy expenses are spent on the heating cost. If not taken care of, debris and dust can build up into the system, and sooner than later, the small issues can develop into larger problems that are not only costly to repair but can also cause energy bills to spike up.

HEATING AND GAS SERVICES

- Gas Line Repairs
- Furnace Installation and Repair
- Furnace Repairs
- Furnace Maintenance
- Gas Appliance Installations

Working in a space where air quality is poor can also cause inconvenience to your employees, which can result in slowing down their productivity. Poor air quality can even cause health hazards.

By keeping the heating systems in top condition, it will not only help you maintain safety and comfort in your building, but it can also save your business from unnecessary energy costs. More than half of the energy expenses that businesses spend go to energy and ventilation costs. With regular maintenance and service, you can reduce energy use by 30%. It also reduces the risk of breakdowns that usually incur costly repairs.

Professional Installation of HVAC systems

From the initial assessment and design phase to the actual installation and final commissioning, UPL ensures that every aspect of the project is carried out with professionalism and a focus on delivering high-quality results.

We stay up-to-date on industry advancements and use the latest tools and techniques to provide efficient, reliable, and long-lasting HVAC systems.

Our company has a fresh and forward-thinking approach, taking full responsibility for your systems to guarantee exceptional performance and minimize downtime. We prioritize sustainability and deliver systems that reduce carbon emissions.

Reliable Commercial & Industrial Heating Service

We are dedicated to helping industrial and commercial property owners keep their heating systems in top condition. We are a team of skilled engineers with a long history of success in the trade.

A company that is focused on quality and safety, we guarantee that our heating services are incomparable. We are Gas Safe registered and are qualified to perform all types of heating services for all sizes of buildings.

All heating services we perform are tailored according to the client and the building's requirements. We will take care of all your heating service needs at cost-effective prices.

Ventilation

A well-balanced ventilation system is necessary for all types of commercial spaces, be it a retail store or multiple-storey office buildings. The consistent supply of clean and fresh air is crucial in creating suitable working and living conditions in these types of spaces. Various problems and physical conditions have been associated with poor indoor air quality. This includes foul odour, premature damage on walls, as well as headache and other health symptoms. Without proper ventilation, the interior of your building will become unsafe and inconvenient. And since you, your employees, and clients spend most of the day inside your building, it is necessary to have a carefully planned ventilation system that could have a positive impact on everyone.

Efficient Commercial Ventilation System

If you are looking to have an efficiently run ventilation system for your commercial space, UPL is the team to call. Our engineers are experts in creating an efficient solution for commercial and industrial properties' ventilation needs.

We are a Gas Safe registered heating and ventilation business serving clients all over Uganda. We are known for our high-quality services and cost-effective prices. With years of experience in the trade, we have already gained sufficient skills, knowledge, and experience in creating ventilation systems for any type of property.

We perform a detailed inspection of the property and communicate with the owner to create the most suitable and efficient ventilation solution that meets their requirements and satisfaction. We work with safety and quality in mind, so rest assured your property and investment are safe with us.

Air Conditioning

Maintaining the right amount of humidity and temperature in all parts of the building is necessary for comfort and work productivity. A large number of electrical appliances in use, such as computers, and the heat from human bodies can increase indoor temperature making people get tired easily and less productive. These are some of the many reasons why a well-working air conditioning unit is a must for commercial buildings

Besides maintaining the right amount of indoor temperature and humidity during warm seasons, the air conditioning system helps improve air quality. It filters down dust and dirt particles, and even bacteria, from outdoors and circulates clean air into the room. It also frees air from too much humidity in certain seasons.

To get the optimum benefits of air conditioning for your property, you should only choose experienced and qualified engineers to perform the installation, maintenance, and repair works. With their knowledge and experience, these qualified professionals can assure you a successful installation and service, free from problems and inconveniences..

Air Conditioning Specialists

Heating & Ventilating Services are a team of qualified engineers and technicians with vast knowledge and experience in installing, repairing, and servicing air conditioning systems in Kampala and Beyond. We fit different types and makes and models of air conditioning systems with ease and efficiency.

A poorly maintained air conditioning unit can eventually become problematic and less efficient. You can rely on our regular servicing in keeping your air conditioning unit at optimal condition and efficiency. Our technicians can quickly determine problems and provide the most suitable solution at a cost-effective price.

Enjoy the benefits of top-quality air conditioning services with the help of Heating & Ventilating Services. Contact us for enquiries and appointment requests.

Heat Pumps and Mini Splits

Our team installs and maintains heat pumps and mini-split systems, which are constantly improving due to technological advances. Heat pumps are energy-efficient and do a lot more than heat a home or business. They also provide cooling and dehumidifying. Mini-split systems also heat, cool and dehumidify, and they are excellent for a small area such as a single room, a converted garage or an office apart from the main building. They're easy to install and they require no ductwork

Renewable Air Source Heat Pumps

If you are looking for an environmentally friendly and cost-effective alternative for your property's heating and cooling needs, renewable air source heat pumps will fit the bill.

This modern and innovative green technology is capable of delivering up to three times the amount of heat energy than the electrical energy a property usually consumes. It can match the ability of traditional gas heating systems but only uses minimal electricity and causes minimal damage to the environment. In terms of longevity, a renewable air source heat pump can last for up to 20 years and more as long as installed properly. Adequate maintenance is also necessary to keep the system in optimal condition for many years. A renewable air source heat pump can be installed in a property without any expensive and time-consuming ground involved. With the help of professional engineers who are qualified to install, you can use the unit to warm your home or office in just a matter of days.

Qualified Air Source Heat Pump Installers

At UPL, we are dedicated to providing top-quality services to our clients. We are a business that puts great value on our clients' safety and satisfaction. We have been in the trade for many years, serving hundreds of clients in the commercial and industrial sectors.

We are qualified to install renewable air source heat pumps for all sizes of properties. We take detailed consideration of our client's needs and use an individualized approach in each project we carry out. We will provide you with a solution that is most suitable for your property's energy needs. Every installation is also guaranteed to meet the installation regulations.

We carry out works with safety and efficiency in mind. By choosing us for your renewable air source heat pump needs, rest assured that you will get the most out of your investment.

Commercial Heating Installation & Repairs

Several problems could arise from the poor installation of heating systems. It can cause performance issues such as uneven heating of all the floors which is a huge factor for the discomfort of reduced productivity of your staff. This inefficiency does not only affect everyone's comfort, but it can also lead to the shortened lifespan of the heating system.

Same with poor installation, a subpar repair is also a problem that you could get if you choose to hire someone who isn't well-versed and experienced in the job. Mistakes that could happen during the repair will cost you more. Because of their limited skills and knowledge of the job, they may not feel obligated to perform beyond what is required of them.

To ensure a top-notch installation and repair for your heating system, be sure to trust only qualified and experienced engineers for the job.

Commercial Boilers

Installing commercial boilers is a laborious and complicated task that should only be done by qualified and experienced engineers. Detailed planning and execution need to be carefully considered to ensure a safe and successful installation. If not, the possibility of catastrophic damage and injuries could become inevitable. Also, since commercial buildings come in different sizes and heating requirements, the engineers must be capable of creating a tailored solution for the property's needs.

As an owner, you need not worry about unsuccessful installation as long as the engineers you hire are qualified for the job and have a long history of completing successful projects. Qualified engineers can give you peace of mind with the fact that they know exactly what they are doing and that they can prevent or quickly solve issues that might occur with the installation.

Preventative maintenance

This is a cost-effective way to prolong the lifespan of HVAC systems and reduce capital expenditure by identifying and fixing issues before they become major problems, all while adhering to standards for HVAC maintenance.

Servicing

UPL offers a comprehensive service for air conditioning systems, providing repair services for optimal operation and cost savings, ensuring quality operation for your air conditioning and ventilation systems.

Emergency support

Irrigation Systems

Irrigation systems conserve water and ensure optimal watering levels at residential, commercial and multi-family properties

Irrigation Systems for Optimal Watering

Watering the lawn and garden at your home may seem like an easy enough job, but in practice, it can be difficult to achieve the right balance between enough watering and too much or too little. Fortunately, irrigation systems can help.

Properly installed and maintained irrigation systems save time, money and water. At UNIQUE PLUMBERS, our skilled professionals can help ensure your home is equipped properly and that your landscape gets the right amount of irrigation without overwatering. Our trained engineers are experts in all aspects of lawn sprinkler and irrigation systems, and are also fully licensed in backflow prevention—a crucial element in keeping potable water supplies clean and safe.

Irrigation system services

Properly managed irrigation systems not only ensure your landscape looks its best, but also help reduce your water bills. If you're interested in installing an irrigation system, UNIQUE PLUMBERS is here to help.

We provide a range of irrigation services, including:

- Maintenance of lawn sprinklers, water pumps and more
- Emergency repairs
- Installation, maintenance and repair of backflow prevention components
- Regular and seasonal reduced pressure zone (RPZ) certification, documentation, and reporting
- Smart irrigation control system installation, which can help save up to 50% on water bills

Ensuring the Efficiency & Reliability of Your System

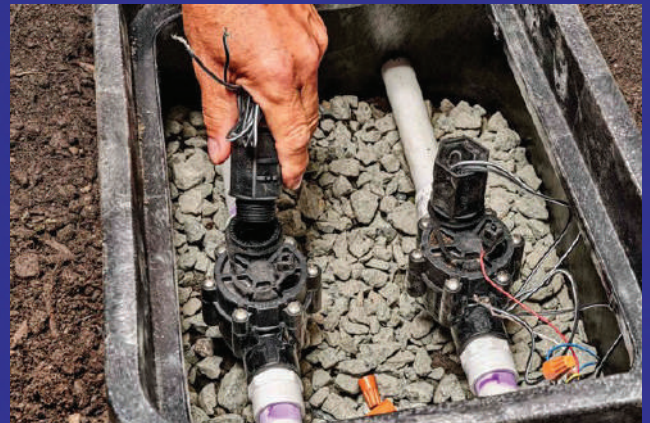

How effective is your irrigation system? If you're experiencing leaks, water runoff, or any other type of problem with your sprinklers, turn to the team that knows best. Unique Plumbers is proud to lead the industry in efficient irrigation services. We've taken watering systems to a whole new level by developing the most efficient and effective way to maintain a beautiful lawn.

Irrigation System Repairs

Irrigation systems require a little TLC to keep working efficiently and effectively. Neglected systems can lead to both dry lawns and landscapes as well as properties that are saturated with water, wasting this precious resource. That is where UPL comes in.

UPL's free Comprehensive system inspection pinpoints any issues your system may have, be it leaks in the water lines, control issues, etc. We'll explain each piece and let you know how we can repair it.

Some irrigation repairs can be done on the spot. Larger repairs may require a second trip, but as your irrigation specialists, we're happy to do it. Our goal is to provide our clients with a beautiful, green property that minimizes water waste, and we stand by that.

Installation Services

Whether you have an old lawn irrigation system or you're looking to implement one for the first time, our team of experienced technicians can provide reliable, money-saving solutions for peace of mind when it comes to your sprinkler installation.

Our trusted technicians can ensure your irrigation system is:

- At peak efficiency throughout the year,
- Personalized to accommodate the needs of your lawn,
- Set to drain properly and minimize water runoff,
- Designed to maximize the lifespan of your lawn,
- And as sustainable and reliable as possible.

Sometimes installing a whole new sprinkler system is the best way to prevent costly repairs and save money in the long run. You can rest assured we'll go over all of your solution options with you so you can make an informed decision.

Commercial Irrigation Solutions

Do you own a commercial property that has landscaping that needs to be maintained? UPL has experience repairing and installing lawn irrigation systems for a wide variety of commercial and business properties. Get started with our team of experts today and inquire about your project. We can provide you with professional insight and reliable solutions to keep your lawn or landscape green and healthy!

Swimming Pools, Waterfalls & Fountains

Transform your outdoor space with Unique Plumbers, Uganda's premier pool and water feature specialists. We're a team of experienced technicians & engineers and architects dedicated to crafting stunning swimming pools, waterfalls, fountains, and other water effects that elevate your property.

Whether you envision a serene backyard oasis or a striking architectural centerpiece, our expertise extends from residential projects to commercial endeavours. Our extensive inventory boasts a range of pool accessories, including fountains, lighting features, and captivating water effects, all designed to bring your vision to life.

Go beyond the ordinary with Unique Plumbers. Our designers possess decades of experience in creating breathtaking artificial rock waterfalls and other unique water features. No dream is too ambitious for our skilled team – we turn aspirations into reality.

Choose Unique Plumbers for an in-ground pool waterfall or water feature that perfectly complements your architectural style. Our diverse selection includes natural stone waterfalls, sheer descents, laminar water jets, river currents, negative edge pools, and rainfall effects. We offer seamless design and construction, making it easier than ever to create a luxurious pool paradise.

From residential pools to commercial water features, outdoor kitchens, pergolas, and landscaping, Unique Plumbers offers a comprehensive suite of solutions to enhance your property.

Outdoor Luxury Pools

Unique Plumbers is your local expert for designing, installing and maintaining luxury outdoor pools. Our expert team can design and construct a beautiful pool that blends in with the rest of your outdoor area to create a stunning space for you, your family and friends to swim, relax, socialize around, and enjoy.

As experts in luxury swimming pool design and installation, including infinity pools and plunge pools, we've been creating spectacular outdoor pools for customers across Uganda and the surrounding areas.

Indoor Luxury Pools

When you want to add a touch of opulence and decadence to your home, why not talk to UPL about our magnificent luxury indoor pools? We've been specialists in luxury swimming pool design and swimming pool installation for years and have the experience, creativity, and skill to transform your home and lifestyle.

Exercise Lap Pools

At UPL, we don't just design and install luxury pools for you to enjoy at your leisure or for you and your friends and family to socialize in and around. We create pools that can help keep you fit as well. Swimming is generally rated as one of the best forms of exercise, because it builds body strength and provides a cardiovascular workout, helping you to maintain healthy lungs, muscles, and heart.

Our exercise pools exude luxury and are impeccably

designed to not only enhance your workout regimen but also exude a stunning aesthetic. Our team has years of experience and is on hand to provide bespoke advice tailored to your unique requirements, and can arrange a comprehensive site visit to assess your property and provide a detailed quotation.

Plunge Pools

Plunge pools are small, shallow pools designed to allow you to wade, lounge, or just cool off at the end of a hard or hot day. That doesn't mean they can't be just as special or spectacular as some of our larger pools, though. Here at UPL, we design and build some of the most luxurious and opulent plunge pools imaginable. We have the knowledge and expertise to design, build and install pools that perfectly reflect the lifestyles and desires of our customers.

Infinity Pools

There's nothing quite like relaxing in one of our infinity pools. Immerse yourself in the epitome of opulence where the boundaries between water and horizon vanish. They're designed to completely blend in with the surrounding environment, thanks to the rimless edge that gives the impression of the water flowing off into infinity. If you've got the view to go with it, it's probably the most stylish and decadent of all our luxury pools. Here at UPL, we have been designing the most elegant and exquisite award winning swimming pools for customers in Kampala and the surrounding areas.

Custom Spas

A luxury tiled spa can make for a glorious addition to your swimming pool area, helping to transform it into your own private relaxation sanctuary. After an energetic swim, chilling out in your own tiled spa while invigorating hydrotherapy massage jets soothe your tired muscles is perhaps the ultimate luxury. At UPL, we've been designing and building custom award winning spas and swimming pools for customers across Surrey, Hampshire, Berkshire and the surrounding areas.

We use our creative imagination and construction expertise to ensure that the home spas we create entirely meet your hopes and dreams and deliver that impressive and opulent indulgence you're after.

Hot Tubs & Jacuzzis

Hot tubs and jacuzzis are fantastic for enjoying the multiple benefits that hydrotherapy can bring, from easing muscle tension and relieving aches and pains to promoting good mental health by helping us relax and deal with stress at the end of a hard day. You can also now enjoy these benefits in your own home.

Discover the perfect hot tub or jacuzzi for your home with the expertise of UPL, we're renowned for our exceptional services.. Transform your space into a personal oasis and embrace the transformative power of hydrotherapy today – book your consultation online or give us a call to speak to our experienced friendly team.

Swimming Pool Features

You might think that just having your own individually designed luxury swimming pool would be enough for most people. But if you like to push the envelope even further, we can add some stunning swimming pool features that can make your experience even more special, even more, extravagant and even more magnificent. We've been designing and building award-winning luxury pools in Uganda and beyond. We're recognized for the creativity of our designs, the quality of our craftsmanship and the exceptional levels of customer care that we put into every job.

Freeform Pools

When you're thinking about your ideal custom pools, you don't have to be limited by anything other than your imagination. Our freeform pools can be just about any shape you want, although we do recommend you stick to one that's enjoyable and practical! What it does allow, however, is for the shape of your pool to flow completely with the surrounding landscape, meaning that your luxury pool could be completely unique to you and your home.

Custom Waterfalls & Fountains

The true symbol of opulence and elegance in an outdoor space is the serene allure of a waterfall or fountain. The soothing sounds of bubbling water create a natural backyard symphony that relaxes and mesmerizes all who enter. If you were wondering what the finishing touch to your perfect design might be, a UPL custom fountain or waterfall is the answer. We are the leading waterfalls and fountains experts.

At UPL, we have years of experience servicing the outdoor space design needs of homeowners. Our designers are unmatched and will work closely with you to bring your dream of the perfect outdoor space into reality.

A fountain or waterfall can also create a theme for your outdoor space. Perhaps you would like the conservative mystique of a low fountain over a Japanese-inspired rock garden. Or maybe you would prefer the luxurious feel of a Mediterranean-style marble-tiled waterfall. You could even add some color and flair for a contemporary look with acrylic fountains. Or perhaps you want to go modern and simplistic with some metal or copper wall fountains. We always use the highest quality materials, and we make sure they are an accurate reflection of the home and the homeowners. That is why we are trusted UPL contractors

- Garden Fountains

What our customers are saying

We've used Unique Plumbers exclusively since 2018 and purchase some of the plumbing supplies from their store. We've always been pleased with the workers and the work they've done. Eng. Bernard has worked here previously, and he's the best. A great representative of your company

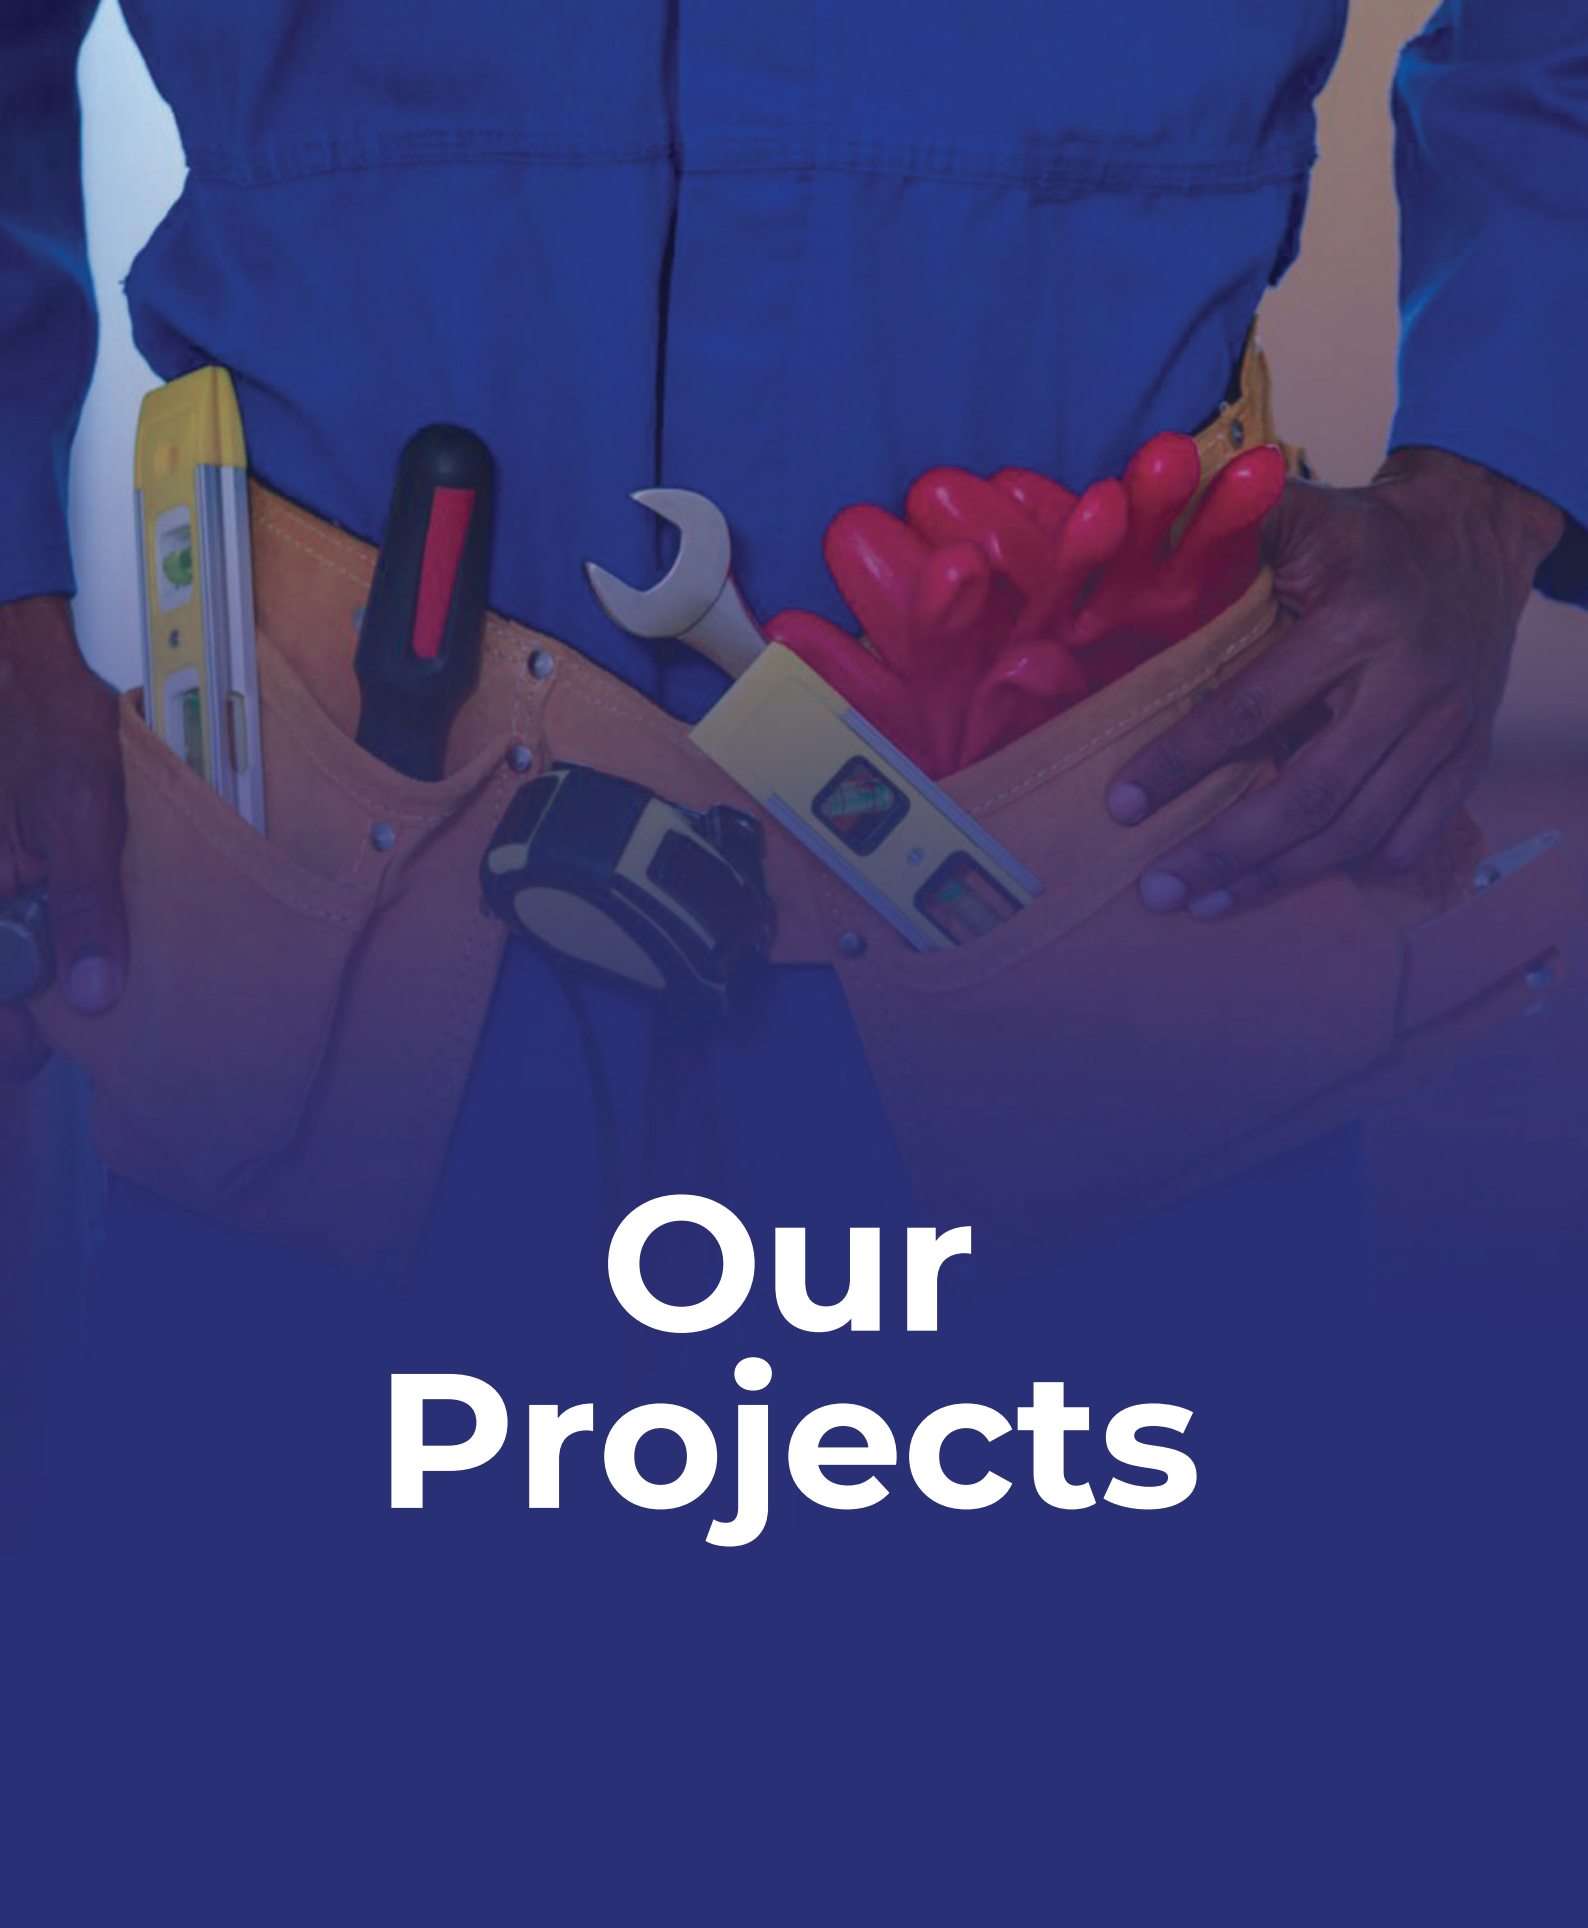

Bosco Ngirabanzi
MESTIL HOTEL & RESIDENCES

As a business owner, reliable plumbing is crucial. Unique Plumbers are our go-to for all our plumbing needs. They're always on time, knowledgeable, and take care of everything without disrupting our operations. Highly recommended!

Sven Saint Calbre
LATITUDE 0

I'm not very handy, so when my kitchen sink sprung a leak, I panicked. Unique Plumbers were fantastic! They explained everything clearly, fixed the problem fast, and even cleaned up afterwards. A big thank you to the team!"

Kamya Umar
HOME OWNER

Suppliers

The very nature of our business necessitates a large and varied supply chain which presents both challenges and opportunities. As new accounts are won, we invariably add new vendors to the system. The challenges are centered on supporting the sourcing teams across our reach, ensuring that we have the correct supply chain to support the growth in new business enquiries. Our suppliers and business partners are vital to our continued success
